The record-breaking 11 rigs at Drydocks World's Dubai yard

Drydocks World in Dubai has completed work on one of the largest tankers in the world, the 442,000 dwt Overseas Laura Lynn, for Overseas Shipholding Group. The project confirms the yard's position as one of relatively few worldwide that can accommodate vessels of such size.

The vessel was docked in Dubai for the first time in 2008 when it was known as TI Oceania. Now renamed, it recently made a second visit to the yard, when the scope of work included a main engine overhaul, boiler cleaning, the overhaul of the cargo and ballast valves, pipe renewal and cooler and heater maintenance.

In another notable milestone, the yard has recently simultaneously berthed 11 rigs, a new record. The achievement reflects the value of establishing a dedicated rig division. Key clients for the rigs recently in the yard include Saipem, Saudi Aramco, Shelf Drilling, Aban Offshore and the National Drilling Company.
